

Questions re: CoVid19 Impacts on Campers

As we all know, camp is a fun, fast-paced, richly social hands-on learning experience that has a tremendous positive impact on children. In order to help us help your children get the most out of this wonderful opportunity, we would like to know about anything that might affect their ability to participate fully and successfully. This is especially true in this era of the CoVid19 pandemic and its impact on the life of your family and your children. The more information we have about your child the better able we will be to support them and help them get as much out of camp this summer as possible. Anything you share with us will be held in the strictest of confidence.

1) What losses or significant changes has your child experienced during the CoVid19 pandemic? (Examples might be death of a relative or family friend, parental job or business loss, loss of school or sports season, cancellation of other travel plans, etc.)

2) How has your child handled being out of school, away from their friends and sheltered-in-place with your family? (Examples would be irritable, cranky, anxious, calm, focused. If it is mixed, please share as complete a picture as you can).

3) What has been your child's reaction when they knew they were coming to camp? (Please give a full mix of the reactions: excited, relieved, nervous-anxious (about what), eager, hesitant, etc.)

4) Is there anything else about your child's behavior during the pandemic that you think will help us help them take full advantage of their time with us?
